Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-12, drawn to a method of fabricating a board, classified in class 264.
 - II. Claims 13-17, drawn to a board, classified in class 428.
 - III. Claims 18-23, drawn to a door in combination with a door frame and a board, classified in class 52, subclass 784.11.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the board as claimed could be made by another and materially different process. For example, the board could be dried without the use of an oven, and the mixture could be blended by hand in place of the high speed blender.
3. Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the door may not require the specific weights of the subcombination to be patentable. The subcombination has separate utility such as a trim board for moldings.

Art Unit: 3635

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, restriction for examination purposes as indicated is proper.

6. A telephone call was made to Sanford Warren on 9/25/02 to request an oral election to the above restriction requirement, but did not result in an election being made. The examiner pointed out that it appeared that claims 14-19 should be dependent upon claim 13 instead of claim 12. Mr. Warren tentatively agreed and said that he would address this issue in response to the above restriction requirement. Therefore, the examiner's restriction requirement is based on claims 14-19 being dependent upon claim 13, not claim 12.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
